

REFRIGERATED VAN

PRODUCT INTRODUCTION

Key Features:

Sealed Insulated Panels – Lightweight, corrosion-resistant, and highly durable.

Composite Surface – Smooth, paint-free finish for easy maintenance and branding.

High-Strength Bonding – Fused panels prevent thermal bridging.

Reinforced Baseplate – Anti-corrosion plywood with steel crossbeams for impact resistance.

Flexible Design – Optional side doors and multi-temperature zones.

Customizable Interior – Racks, cargo anchors, and meat suspension systems available.
